"In fact," he added: "I almost always use low doses of statins in people over 75 unless they have known heart disease, since most of the benefit of statins is achieved with low doses and there are good reasons to be concerned about the safety and tolerance of higher doses of statins in the elderly." People over age 75 are under-represented in clinical trials, leaving physicians in the dark as to safety.

There is no change for the same reason that there is no real need for an actual 'plan', namely the fact that both parties are responsive not to the voters but to their major financial backers; and they know they can get away with this because they have colluded for more than a century to effectively squash any actual competition in our politics through the passing of restrictive ballot access laws for third parties and independents, the

encouragement of media consolidation, which limits the debate to those topics corporate-financed candidates are prepared to discuss, etc
